Sanganer, Jaipur, Rajasthan

Objective

Results-driven Data Analyst with hands-on experience in data analysis, data visualization, and AI-powered reporting. Proficient in Python, Pandas, NumPy, SQL, MySQL, and React.js. Demonstrated ability to build full-stack AI dashboards, automate reporting workflows, and deliver actionable business insights. Strong foundation in data cleaning, data mining, and data quality management. Passionate about transforming raw data into decision-driven solutions using modern analytics and AI integration tools.

Technical Skills

Programming Languages: Python, SQL, MySQL

Web Frameworks: React.js, Tailwind CSS

Tools & Platforms: Excel, Git, GitHub, VS Code, MySQL Workbench, AI Integration

Core Competencies: Business Intelligence, Problem Solving, Front-End Development

Work Experience

Data Quality Analyst

AxeTrack Software

October 2025 – April 2026

Jaipur, Rajasthan

- Performed data mining and data management on large Excel datasets to support business operations and decision-making.
- Cleaned, validated, and organized raw Excel data prior to uploading into the software system, ensuring data accuracy, consistency, and integrity.
- Identified and resolved duplicate, missing, and incorrect records, improving overall data quality and reducing processing errors.
- Collaborated cross-functionally with operations and technical teams to maintain structured data workflows and improve operational efficiency.
- Applied data quality best practices to reduce data-related processing errors by ensuring systematic validation before each upload cycle.

Frontend Developer Intern

WebMobi360

February 2025 – May 2025

Internship

- Developed responsive web pages using React.js and Tailwind CSS, improving UI/UX for the company.
- Collaborated on a WordPress and React integration project, gaining frontend-backend connectivity experience.
- Improved debugging and problem-solving skills through real-time development tasks and issue resolution.
- Worked with Git for version control and learned code optimization best practices.

Projects

AI Business Command Center Dashboard

GitHub Link

- Built a full-stack AI-powered business analytics dashboard using React.js, FastAPI, Python, and MySQL, reducing manual reporting time by 70%.
- Automated region-wise sales analysis with real-time KPI tracking and dynamic data visualization, eliminating 3–4 hours of weekly manual data compilation.
- Integrated AI-generated business insights enabling non-technical stakeholders to query sales data in plain English, reducing analysis time from hours to seconds.
- Implemented one-click CSV export functionality and interactive charts (Bar, Pie, Line), replacing manual Excel reporting for faster and more accurate business decisions.
- Designed RESTful APIs using FastAPI for seamless data flow between the Python backend and React.js frontend, improving system performance and scalability.

Education

Bachelor of Science (B.Sc.) in Mathematics

Maharshi Dayanand Saraswati University (MDSU)

2021 – 2024

Ajmer, Rajasthan

Certifications

Software Development Program — IANT Institute

March 2024 – April 2025

AI and Data Science Program — AU Ignite Future Skills Academy

April 2026 – July 2026
